## About This Game

your screen becomes a stage on which you investigate this mysterious suicide as three distinct characters: cheeky blogger Romana Teague, down-and-out local reporter Jack Bellet, and cynical private investigator K.C. Gaddis.

In this demo, play the first three scenes of Act 1: Wonderland - a swamp noir stage play presented as a computer game!

Experience a magical reality where characters are transported among scenes, set pieces moved into place, and music wafts from the orchestra pit. *Knee Deep* is about characters, storytelling, and melodrama in swampland Florida.

- Uncover a swampland conspiracy—Use your skills of observation, deduction, and cleverness to pull back the curtain and reveal the true story behind this backwater community.
- Dynamic storytelling spotlights choice and consequence—Engage in realistic conversations that evolve based on your choices, but beware as critical decisions could lead to a breakthrough...or someone getting hurt.
- Gaming goes to the theater—Vivid voice acting, imaginative set transitions, and melodrama specifically designed for the digital stage
- A swamp noir adventure in three acts—enjoy Acts 1 and 2 now, then look forward to Act 3 on March 8, 2016!
